

Environmental Policy Statement

Smelter Service Corporation takes seriously our responsibility for environmental protection and believes we should play a proactive role in addressing the challenges facing the environment. Smelter Service Corporation's Environmental Management System incorporates the environmental activities related to the recycling of scrap aluminum including storage, transportation, and administration for plant location in Maury County, Mt. Pleasant, Tennessee.

Therefore, Smelter Service Corporation commits itself to:

1. A clean environment that is necessary for the well being of our society, our employees and our business,
2. The compliance of all applicable laws, regulations, and other requirements,
3. Pollution prevention,
4. Continual improvement in environmental performance and management processes,
5. The improvement of employee environmental performance through training and procedures,
6. Establish, maintain, and periodically review objectives and targets that address the most meaningful impacts associated with our activities.
